„Future generations have a right to unspoiled and unpolluted earth, including the right to a clear sky. The dark sky is the cultural, scientific and ecological heritage of humanity. „

UNESCO (Tenerife, 1994, La Palma 2007)

ASTROTOURISM is travelling for the purpose of astronomy or doing astronomy while you travel. Starry Sky parks are main places where developing astrotourism and amateur astronomy. Starry-Sky (and Dark-Sky) Park this is an area of land low contaminated by artificial light, with unique environment that is dark of the night. Such areas are the equivalent of refuges extremely valuable natural space. Meet the protective functions of the darkest corners of the planet where the environment is not disturbed night by artificial light. Areas such as the classical nature reserves have not only ecological functions, but also educational and touristic functions.
